PREFACE.

IN view of the approaching celebration of the bicentenary of the birth of Linnæus, the Trustees of the British Museum have decided that the section of the Catalogue of the Books in the British Museum (Natural History) relating to the works of that distinguished naturalist shall be printed in advance, with the addition of the titles of such works as are preserved in the Printed Book Department at the British Museum (Bloomsbury), but are not included in the libraries at the Natural History Museum.

The complete list, therefore, shows to what extent the writings of Linnæus are represented in the British Museum as a whole.

The work has been prepared by the Assistant in Charge of the General Library at the Natural History Museum, Mr. B. B. Woodward, with the collaboration of the General Catalogue Consultative Committee, as regards the books at South Kensington, and of Mr. W. R. Wilson, I.S.O., of the Printed Book Department, as regards the books at Bloomsbury.

Director.

The equivalent Swedish names are given in the Mineralogical portion only of the work.

§ C. Linnæi . . . Methodus juxta quam Physiologus . . . concinari potest historiam cujuscunque Naturalis Subjecti. *1 p.* fol. *Lugduni Batavorum*, 1736.

Printed as an appendix to the "Systema Naturæ," and, under the title "Methodus demonstrandi Lapides, Vegetabilia aut Animalia," included at the end of each edition from the second to the ninth.

—— [Another edition.] C. Linnæi . . . Systema Naturæ, &c.—C. Linnæi . . . Natur-Systema . . . in die Deutsche Sprache übersetzet, und mit einer Vorrede herausgegeben von J. J. Langen. *pp.* [*iv,*] *70.* LAT. & GERM. obl. 4°. *Halle*, 1740.

A reprint of the first edition, in which only the order of the matter is re-arranged, accompanied by a German translation in parallel columns. Lange's preface is dated 4 May, 1740.
Linnæus placed this third in his list of editions.

—— Editio secunda, &c. *pp. 80.* 8°. *Stockholmiæ*, 1740.

This was the official second edition, and the dedication is dated 20 May, 1740. The contained matter has undergone alteration. Two issues appeared in the year: the one bearing the monogram of the publisher, "G. R.," on the titlepage, the other a vignette representing a garden.

The second edition of the "Fundamenta Botanica" [*q.v.*] was issued, and is frequently bound with this edition of the "Systema," although having a distinct titlepage.

Swedish names are given in both the Mineralogical and Zoological portions of the work, but not in the Botanical.

—— Editio quarta ab auctore emendata & aucta. Accesserunt nomina Gallica [by J. Jussieu]. (Fundamenta Botanica.) *pp. 108* (*xxvi*). 8°. *Parisiis*, 1744.

This edition was seen through the press by A. Bäck, who was then at Paris.

French equivalent names are added throughout, the Swedish being omitted, otherwise this edition does not differ in any very important respect from the official second.

The "Fundamenta Botanica" appended is a reprint, and has no distinct titlepage.

Wanting. This is said to be identical with the second edition, with the addition of the names in German.

—— Editio sexta, &c. *pp.* [*ii,*] *224* [*27*]*: 8 pls.* 8°. *Stockholmiæ*, 1748.

Wanting the portrait of Linnæus.

The names of the Animals and Minerals are given in Swedish as well as in Latin.

Cf. Montin's transcript of Linnæus' lectures, infra [*Miscellaneous*].

—— [Seventh edition.] Secundum sextam . . . editionem. *pp.* [*iv,*] *224* [*30*]*: 8 pls.* 8°. *Lipsiæ*, 1748.

A reprint of the preceding, but with the German, instead of the Swedish names.

This was counted by Linnæus as the eighth edition, although unaccompanied by the other portions of the work. He also counted with it the following edition of the "Regnum Lapideum."

The substance of the lectures set down in these two note-books corresponds so closely with the matter of the first edition of the "Philosophia Botanica" as to show that the latter was based on them.

C. Linnæi . . . Almänne föreläsningar öfver Diaeten hålne [*sic*] wår- ock [*sic*] höst-terminerne år 1748, samt wår-terminen 1749 [written down by] L. J. Montin. *pp. 616.* 4⁰.

Although the arrangement of these notes approximates that of the equivalent section of the "Systema Naturæ" in the editions published at Leipsic in 1748 and Leyden in 1756, the subject is dealt with at far greater length.

These notes stop at the end of "Pisces." They correspond in number and order of genera to the equivalent section of the "Systema Naturæ . . . secundum sextam . . . editionem," Lipsiæ, 1748, but deal with the subject at greater length.
